

THINKERS 2015**Jenny B. Osuldsen**

Jenny is one of the world's foremost landscape architects and a partner in Norwegian architectural firm Snøhetta a transdisciplinary Landscape, Interior, Graphic Design and Architectural studio. Snøhetta has developed a reputation for maintaining a strong relationship between landscape and architecture in their projects. Jenny joined Snøhetta in 1995. She is also Professor in Landscape Architecture at the University of Life Science at Ås, in Norway and Guest Professor at Ax:son-Johnson Institute of Sustainable Urban Design SUDes at the University of Lund, Sweden. www.snohetta.com

**Janna Bystrykh**

Janna Bystrykh is an associate at OMA*AMO, Rotterdam, the Netherlands, specialized in urban, educational and cultural projects. Janna joined OMA in 2010 to work on Strelka's educational programme, and in 2011 she supervised the Hinterland research theme. More recently, she has been responsible for the Small Hermitage transformation project and the new Hermitage Repository and Library building of the State Hermitage Museum in St Petersburg, and participated in the development of the Elements of Architecture Exhibition, Venice (2014). www.oma.eu

**Filippo Lodi**

Filippo is a Senior Architect / Associate at UNStudio. He is an all-round architect specialized in parametric and product design. Beyond the production of design deliverables, Filippo is responsible for ensuring a high level of design quality in-line with UNStudio standards. He joined UNStudio in 2008, and has worked on several major projects including the Museum of Middle Eastern Modern Art in Dubai, the Post Rotterdam complex, and the Kutaisi International Airport in Georgia. Filippo is also the Inventive Materials Knowledge Platform Coordinator at UNStudio. www.unstudio.com

**Alice Dietsch**

Alice was made a director of AL_A in 2012 having joined the office in 2006. She has led the much anticipated V&A Exhibition Road project, since it was won through an international competition, to design the new entrance, gallery and courtyard for the Museum. She has also been working with a team in Thailand to develop the Central Embassy project in Bangkok, a 1.5 million square foot scheme merging a 7-storey luxury shopping mall with a 30-storey, 6-star hotel tower into a cohesive and sinuously twisting shape. Alice coordinates the competition group in the office and is fluent in developing innovative concepts within budgetary and technical constraints. Her working methods are driven by extensive research, experimentation and intellectual challenge. <http://www.ala.uk.com>

THINKERS 2015**Nacho Martín Asunción**

Nacho is founder and director of Mi5 Architects (Madrid-London) and its digital counterpart Made in Space VR, an office aimed to design the new scenarios for Virtual Reality. He obtained his Ph. D. (Cum Laude) in 2013 and he is Unit Master at the Architectural Association in London.

<http://www.mi5arquitectos.com>

**Tuomas Silvennoinen**

Tuomas is an architect and a partner at Helsinki and Beijing based PES Architects. <http://www.pesark.com>

**Paul Cocksedge**

British designer Paul Cocksedge creates visually spectacular and technically ingenious lights that celebrate the magical and transformative qualities of illumination. Together with Joana Pinho, he set up Paul Cocksedge Studio in 2004. His output includes lighting for manufacturers such as Flos and Established & Sons, window displays for Hermès and the Wellcome Trust and sculptural installations for the Design Museum and the London Design Festival.

**Antti Nousjoki**

Antti is an architect, a visiting professor at Columbia University in New York, and a founding partner of ALA Architects, a Helsinki-based firm. ALA has been one of the frontrunners of a new generation of Nordic architecture practices, and has completed several major public projects, including the Performing arts Centre “Kilden” in Kristiansand, Norway (2012) and Kuopio City Theatre (2014). They are currently designing the new central library in Helsinki amongst other high profile commissions. www.ala.fi

THINKERS 2015**Steven Bradley**

Founder of SAB Connect Steven Bradley has developed his business strategy skills and competencies in 25+ years of experience in global business development and growth strategy, with a variety of international partners, and a special focus in the architectural lighting industry. By leveraging this worldwide experience and expertise, combining it with a network of global partners, SAB Connect offers the powerful benefits of this knowledge and relationships to its international clients from Europe, North America, Asia and the Middle East. www.sabconnect.com

**Santeri Lipasti**

Santeri is a Partner in the Helsinki based Huttunen-Lipasti-Pakkanen Architects Ltd. The office's projects range from experimental housing to high end public buildings and from product design to town planning. Last year they were awarded both the Concrete Structure 2014 and the Wood Architecture Prize 2014 awards. Lipasti has also worked at the Aalto University Department of Architecture teaching the Urban Renewal course. <http://www.h-l-p.fi>

**Aleksi Niemeläinen**

Partner at Helsinki based multidisciplinary design practice Futudesign and a creator of an underground online forum for Helsinki-based young designers and architects. The forum was anonymous and uncontrolled, filled with anarchy towards "the establishment" of the scene. That website was Futudesign. They have designed award winning restaurants, new art hotel in Helsinki, taken part in Uusi Kaupunki (New City) -architecture collective and performed in several architecture TV-shows. Futudesign embraces new technologies and use inherently 3D-printing, laser cutting, programming and other intriguing methods in their projects. Aleksi teaches sustainable city planning at the Aalto University. www.futudesign.com

**Tapio Rosenius**

Tapio is the founder and design director of Lighting Design Collective. Originally from Finland he is a highly recognized designer and an artist with over hundred completed projects in 24 countries in the Europe, Africa, Asia and Middle East. His work with light has been recognized in numerous awards from the fields of lighting design, architecture and art. He has served as Guest Academic Director of Advanced Lighting Design at ETSAM University in Madrid and as a council member and the Director of Membership for the Professional Lighting Designers Association. www.ldcol.com

THINKERS 2015**Kristian Krogh**

Kristian is a partner and lighting design director at Lighting Design Collective in London, United Kingdom. Kristian has over 12 years of experience in Product and Lighting Design ranging from custom made lighting products to site wide lighting solutions for corporate, retail, government, residential and leisure clients. His background in product design and Scandinavian roots drives his attention to design simplicity and functionality.

Kristian has worked on and completed architectural projects from Haiti to Hong Kong across a plethora of project types. www.ldcol.com

**Jari Vuorinen**

Jari is a partner and lighting design director at Lighting Design Collective Oy in Helsinki, Finland. His love for narrative driven design and his background in film lighting drives his creative approach. His methodology is holistic with focus on bringing out the character and hierarchy of the space through the media of light. Jari has completed a number of diverse and creative lighting design projects ranging from individual art commissions to large scale retail, commercial and cultural buildings. www.ldcol.com

**Marco Bevolo**

Urban futures sociologist & session moderator. Marco is a Lecturer in International Leisure Management at NHTV University of Applied Sciences, Breda and a Principal Urban Futures consultant for Philips Lighting EMEA. He is the editor / co-author of four books, including the global edition of city.people.light (2007), an anthology of world class urban futures concepts, and the European "Create the Livable City" (2014). He is the recipient of a 2011 Award of Excellence by Emerald Literati and a PhD candidate (University of Tilburg, NL) with research on the role of design in urban futures, Bevolo graduated as "Dottore in Lettere Moderne" in Turin.
